## Skills

---

**Programming Languages:** C, Java, JavaScript, PHP

**Frameworks and Tools:** React.js, jQuery, Tailwind CSS, Bootstrap, Laravel, Codeigniter, Node.js, Express.js, Git

**Database:** MySQL, PostgreSQL, MongoDB

**Cloud Technology:** Creating instance as per requirement, Managing security group, Attaching EBS and EFS volumes to EC2 instance, Creating IAM roles and policies for multiple users and services, Management of VPC and other AWS services, Monitoring environment as well as application with the help of Cloud Watch, Creating S3 buckets and implementing

**Operating Systems:** Windows and Linux

## Work Experience

---

**GRAWLIX** | Software Engineer Intern

**Nov 2023 - Jan 2024**

- Led the implementation of responsive and user-friendly UI/UX designs on the frontend, elevating overall user experience.
- Specialized in backend development, focusing on optimizing database queries and enhancing system performance to ensure robust functionality.
- Successfully designed and implemented a CI/CD integrated project, streamlining the development process and ensuring efficient project delivery.
- Proficient in utilizing Laravel and CodeIgniter frameworks, demonstrating expertise in crafting scalable and maintainable backend solutions.

**OASIS INFOBYTE** | Web Development Internship

**Aug 2023 - Sep 2023**

- Participated in a virtual web development internship, acquiring hands-on experience in both front-end and back-end development. Gained mastery in HTML, CSS, JavaScript, React, and responsive design techniques.

## Projects

---

### Chat Application

*Developed a real-time messaging chat application in Java, utilizing data structures such as queues for message handling, sets for managing active users, and hash maps for user connections.*

- Implemented functionalities including sending messages between users, viewing messages, and managing user connections, providing a seamless communication experience within the application.

### Instagram Clone

*Developed a Instagram clone using Node.js, Express.js and MongoDB.*

- Crafted essential features including user authentication (login/register), profile editing, photo posting, search functionality, and post liking, enhancing user engagement and interaction within the app.

### Ochi Design Clone

*Developed a visually stunning, animated frontend clone of a modern Ochi design website using React.js and Tailwind CSS.*

- Implemented dynamic user interactions and seamless animations, elevating user experience and demonstrating proficiency in cutting-edge web development technologies.

### Tiff'in Time - DBMS based Tiffin Service Portal

*An end to end Database focused portal using HTML, CSS, JavaScript, Bootstrap, PHP, PostgreSQL where users can order their tiffin.*

- Developed an online tiffin service platform enabling food ordering and customization for enhanced user experience.
- Developed an admin dashboard for efficient order management.
- Developed by a collaborative team of four, I led the backend development.

## Education

---

**Nowrosjee Wadia College, Pune, India**

**2020 - 2023**

- B.Sc. (Computer Science) | CGPA: 9/10

**Nowrosjee Wadia College, Pune, India**

**2018 - 2020**

- XII (HSC), Percentage:60%

**Immanuel Marthoma School, Pune, India**

**2018**

- X (SSC), Percentage:77.40%
